**Helpful Definitions: for Ribbon Judging of an Orchid Show**

**DEFINITIONS** The following definitions are *unofficial* and are provided to give assistance in determining appropriate classification of entries. Exhibitor is responsible to be sure plants are correctly classified.

**Genus:** A natural grouping of closely-related species. Dendrobium is an example of a genus. The name of a genus is capitalized.

**Species:** A kind of plant that is distinct from other plants. It is not the product of a cross. *Species* names are not capitalized and are printed in *lower case italics*. Example *Cattleya mossiae*

**Hybrid:** The offspring of a cross between two different species or hybrids. Hybrid names are capitalized.

**Primary hybrid:** Cross between two species of the same genus (Interspecific hybrid) or a cross of two species from different genera.

Example: B. Little Stars = B. *nodosa* x *subulifolia* (Interspecific)

Aeridovanda Blue Spur = *Aerides lawrenceae* x *V. coerulea*

**Intergeneric hybrid:** A hybrid between members of two or more genera

Example: Mtssa. Royal Robe = Mtssa. Erachne x Milt. Seminole Blood (*Miltonia* x *Brassia*)

Howeara Lava Burst = Hwra. Mini-Primi x *Rodrigueza lanceolata*

'ara' at end of genus indicates 3+ genera in background
