The Giant CAIOS orchid Auction is a lot of fun and is a chance for members, guests and the public to receive new plants for our collections. A wide variety of plants has been received and more come in every day to Todd. Donations from members are needed, so, comb through your plants and select duplicates, backbulbs and even some that you just can't bloom and get them to Todd (508) 457-0669 days or 548-2344 or bring to the auction. Artwork and Orchid-related items and supplies are also welcome at the Auction. In any case, call Todd for Auction numbers (and put the #s on the plants, plz). Refreshments, friends, **NO** Show & tell this time though. **Members F -M** please bring some nice fingery foods for the revival needs of starved orchid buyers. Come one, come all, tell your friends to come and bid-bid-bid, its for a good cause.

**WHEN** last we met, (in the grand Meigs Room of the Marine Biol Lab in Woods Hole) Hadley Cash of Marriott orchids gave a detailed lecture on the Complex Paphs, a group of large flowered and strongly marked Slipper orchids with a very long hybridization history. The slides were all taken in the same light and size so as to make comparisons easy and he sold plants after the talk. It will be interesting to see what members bloom out of these. Thanks to the MBL for the use of this fine hall. Displayed but not discussed was a pretty Show table as follows:
